## Web Developing Projects

---

I developed this full stack website with backend PHP, MySql and Laravel and frontend css, bootstrap and JQuery

**<https://magazfoundation.com>**

The site is fully dynamic and responsive.

Admin through dashboard can:

- 1] Add, update, delete books and search for book.
- 2] Add, update, and delete categories and subcategories.
- 3] Add, update, and delete workshops.
- 4] Show and delete orders.
- 5] Block users.
- 6] Change the slider images in the first page.
- 7] Change the blocks books and titles in the first page.

User of the site can:

- 1] Register to the website and mail verification will sent to him.
- 2] Reset his password.
- 3] Buy books by adding them to the caret and follow the buying steps.
- 4] Publish his book and Fill in the publish form, email will be sent to the Admin.
- 5] Change the interface language Arabic/English.
- 6] Search for book by name, author and category.
